Regional Newsletters

The IUCN SSC Primate Specialist Group also produces regional newsletters/journals which publish short articles and notes on general and specific aspects of primate ecology, taxonomy, distributions, behavior and conservation, tropical forest ecology and conservation, forest destruction, and protected areas. Also please send information on projects, research groups, events, recent publications, courses, funding sources, activities of primatological societies and NGOs, and other newsworthy items of interest to primate conservationists, directly to the editors at the addresses below.

Instructions to Contributors

Articles submitted to *Primate Conservation*

Manuscript Format

All manuscripts should be type written, double spaced, with generous margins, and submitted electronically as a Word document or in Rich Text Format (rtf). Please indicate on a separate cover page the corresponding author, address, and e-mail, the date of submission, up to six key words, and a short running title. Please provide an abstract of 300–500 words. Footnotes are to be avoided (except in tables and figures). IMRAD subtitles can be used but are not obligatory. Please give all measurements in metric units. Please take special care concerning diacritical marks of languages other than English. Bibliographic references should be in the following style:

Example – journal article:

Struhsaker, T. T. 1972. Rain-forest conservation in Africa. *Primates* 13: 103–109.

Example – chapter in book:

Goodall, A. G. and C. P. Groves. 1977. The conservation of eastern gorillas. In: *Primate Conservation*, H. S. H. Prince Rainier of Monaco and G. H. Bourne (eds.), pp.599–637. Academic Press, New York.

Example – book:

Soulé, M. E. 1987. *Viable Populations for Conservation*. Cambridge University Press, Cambridge, UK.

Example – dissertation:

Homewood, K. M. 1976. Ecology and Behaviour of the Tana Mangabey (*Cercocebus galerritus galerritus*). PhD thesis, University College, London.

Maps

Maps should always be made as concise as possible and should include an inset showing the location of the area discussed in relation to its home country or continent.

Figures - maps, graphs, illustrations and photographs

We accept high-resolution images in color or black-and-white in EPS, TIF, or JPG formats (300 dpi at the size which you would like to have them printed). All maps, graphs, illustrations, and photographs should be submitted in a file or files separately from the main text. Please list the captions/legends at the end of the main text or in a separate Word document. In the case of photographs, please provide the name of the photographer. We encourage high quality photographs of the species that are the object of the manuscript.

Back cover: White-whiskered spider monkeys (*Ateles marginatus*) on the western bank of the Rio Xingu in the Mekragnoti Indigenous Territory, contiguous to the east with the Kayapo Indigenous Territory. The Pinkaiti Field Station and Ecological Reserve nearby on the south bank of the Rio Riozonho, east of the Rio Xingu in the Kayapo Indigenous Territory is part of a 14-million-ha block of very largely undisturbed primary forest that is officially ratified indigenous territory. Research on the ecology and behavior of the primates there has begun with a study of Uta Hick's bearded saki (*Chiropotes utahickae*) by Jacqueline Ballantine, Postgraduate course in Primate Biology, Behaviour and Conservation, University of Roehampton, London, UK.
